

WHAT'S NEW

Mulvane Vision Care
January, 2004

SATISFACTION GARANTEED.....

Try the best sunglasses on the market...MAUI JIM. These lenses are polarized, scratch coated on both sides, UV coated, tinted, mirror coated, and a water resistant coating. These lenses were designed in Hawaii where the sun is intense. If you order a pair of Maui Jim lenses from Mulvane Vision Care and are not satisfied you can return them for a full refund in 30 days from the purchase date.

TEST DRIVE A PAIR OF MAUI JIM'S

Renee or Nancy will show you our complete line of Maui Jim sunwear. You'll like the feel and the look of the new titanium wrap-arounds. Go ahead try on a pair.

JANUARY IN NATIONAL GLAUCOMA MONTH

Regular optometrist visits are necessary for good vision and eye health. Glaucoma can be tested for at your annual vision exam. Glaucoma is a group of different eye disorders which damages the optic nerve which eventually can lead to blindness. Glaucoma has a hereditary tendency. All blood relatives of a glaucoma patient should be evaluated every year for glaucoma. Most glaucoma occurs in persons over the age of 50 but it may appear in early adulthood. There is even an uncommon childhood variety.

If detected early, glaucoma can be controlled by pressure-lowering drops or laser surgery.

VISION AND LEARNINGHOW ARE THEY RELATED.

Did you know that 70% of the brain is taken up by the process of vision? Did you know that the thickest nerve in the body is the optic nerve? Did you know that it carries more information to the brain than the entire rest of the body? Did you know that vision (the skills of vision) are learned and earned? As a former teacher and now optometrist Dr. Cline is very aware of the link between vision and learning. **Now until the end of January Mulvane Vision Care is offering a FREE screening to identify vision problems that may interfere with learning.**

WOULD YOU LIKE TO KNOW MORE ABOUT HOW VISION RELATES TO LEARNING??????

You can!!! Dr. Cline will be speaking on Vision and Learning on Tues. January 13th at 6:30 p.m. to 7:30. This will be an informative talk full of demonstrations. The next talk will be March 9th at 6:30 p.m. Come join us for an informative hour.

ARE YOUR CONTACT LENSES DRY????

You might want to try one of two new contacts on the market. The PROCLEAR LENS and the EXTREME H2O LENS. These lenses are especially formulated for dry eye environments and they have high breathability. Ask Renee to test drive a pair in the office.
