

ENTER THE FREE DRAWING

During March and April everyone that purchases eyewear or a year's supply of contact lenses will be entered into a drawing for a miniature television/radio.

WHAT IS SHARE THE CARE?

Share The Care is Mulvane Vision Care's way of saying thank you. If you like the care that you received here at Mulvane Vision Care and share that with someone and they tell us we will send a coupon worth 10 percent off on future eye wear purchases. If you tell two people we will send you a coupon for 20 percent off ...and so on. So Share the Care.

DO YOU KNOW WHAT VISION IS????

Most people do not know what vision is. Did you know that 70% of the brain is involved with this process? Eighty five percent of what a child learns comes through the visual system. Most people think eyesight and vision are the same. Some people even assume that if they have or a child has 20/20 eyesight then they have perfect vision. THIS IS FALSE! The term 20/20 only means that the eye can see a size 20 letter at 20 feet. It tells nothing about how the visual system gathers its information and processes that information. We gather information by tracking it, focusing our eyes to make it clear, and aiming our eyes to make it single (not a double image). Do you know that there are children and students who's eyes do not aim where they make the image one at the same place they focus to make it clear? Do you know that children that skip lines or words while trying to read may have an eye tracking problem? Do you know that a child can see print as overlapped and never tell you about it? There are some children that also have difficulty understanding what the visual system gathers. They have difficulty remembering what they see to draw it or to recognize it again. They may have difficulty telling words that are similar are really different. They may reverse letters and numbers.

Dr. Cline is an optometrist with an emphasis in Learning Related Vision problems. The basis goal of his testing is to find out if VISION is interfering or leading and guiding learning. To get an idea of how much information vision can process look around you. Now close your eyes and tell me what other sense can process that amount of information in that short of time.

DO YOU LIKE GOOD SUN PROTECTION FOR YOUR EYES?

The best sunglasses made in America are here at Mulvane Vision Care. You can try them on for FREE. Try them on and look outside. See the difference of Maui Jim. Now through April purchase a pair of Maui Jim and receive a FREE Maui Jim accessory and ½ off on EYESCREAM SHADES for kids.

HAVE ASTIGMATISM AND WANT CONTACTS?

The new BIOMEDICS TORIC is here at Mulvane Vision Care. Many people who have astigmatism have been told they can't wear contact lenses. This is just not so any more. Interested in contacts? Set up an appointment for a fitting or exam and fitting today.
